

# IHC Fundex Equipment®

*Specialist in piling and drilling equipment*

## *September 2011*

After having worked with us for over ten years, our current salesman Mr Arjen van der Schaaf, has indicated that he wishes to end his employment with us. We very much regret this, of course, but we wish him every success with his new employer.

For this reason, we would like to introduce his successor, Mr John Brakman. As of today, he will be your contact regarding sales of new and used machines. You may also address questions and offers regarding our hire equipment to him. Mr Brakman has been a familiar face at IHC Fundex Equipment B.V. for over twenty years. He has held various technical positions within our company in the past and so he is thoroughly familiar with every detail of our equipment. He is therefore in an excellent position to find the optimal solution to all your questions and requirements. We are fully confident that you will soon become accustomed to the new situation as a client.

In part due to the expansion of our product assortment with the full range of Vermeer mini scaffolds, our sales team will soon be expanded further to include a second sales person. We would be pleased to inform you about this in our upcoming newsletter.
